COURSEWORK

- Computer Science I & II
- Data Structures
- Design of Database Systems
- Web Application Development
- Computer Security
- Scripting II
- Software Engineering
- Computer Systems Admin
- Discrete Mathematics
- Modern System Design & Analysis

EDUCATION

University of Houston Clear Lake

Bachelor of Science in
Computer Information Systems

2017-2022

PROGRAMMING/TECHNICAL SKILLS

- C#, .NET, ASP.NET, Razor Pages
- Python, Flask, Dash
- JavaScript, jQuery
- SQL
- HTML/CSS, Bootstrap 5
- Java
- MySQL, SQL Server, Entity Framework
- Git & Github
- Azure/AWS Experience using CI/CD tools
- MacOS, Windows, Linux

PROJECTS

Bug Tracker Web App

C# & ASP.NET Core, SQLite

- A full-stack web app that lets the user create, read, update, and delete bug records from a database
- App uses ASP.NET Razor markup along with HTML/CSS for the front-end, and C# and SQLite for the back-end
- Features a responsive UI design for desktop and mobile
- Demo link: <https://bugtrackerapp.azurewebsites.net/>

Horoscope Web App

Made with Python & Dash

- Comprised of a REST API made with Python, and a front-end component made with HTML/CSS and JavaScript/JQuery
- The web app outputs the user's horoscope asynchronously using the JavaScript fetch API
- Demo link: <https://horoscopeapp.justintruong.studio>

Stock Dashboard App

Made with Python & Dash

- A stock dashboard app that displays a graph with stock indicators, resistance/support levels, and an interactive legend based on the user's input
- App uses the yfinance API and the Dash framework to dynamically display content
- Deployed on AWS using Elastic Beanstalk and CodePipeline
- Demo link: <https://stockdash.justintruong.studio>

WORK EXPERIENCE

Driver & Delivery Driver

Uber/Lyft/Doordash

2015-2022

- Analyzed different market channels for social-events/gatherings to predict busy areas
- Compiled receipts and recorded business miles for tax deductions
- Communicated customer's special needs and requests to kitchen staff

Mobile Sales Consultant

AT&T & Bestbuy

2012-2015

- Collected requirements from customers and provided a tailored cellphone plan based on average monthly data usage
- Managed inventory using an inventory management system
- Troubleshooted devices and transferred data from old to new devices
- Supported and helped train new hires on POS system and how to initiate and close a sale
